

# Eyes contour Peel-off Mask

As an extremely sensitive zone, the fine and delicate epidermis of the eyes contour area gets easily marked and irritated. Based on specific plants' extracts, the eyes contour peel-off mask is suitable for this delicate area. The rice powder and the alginate work together to make a very soft film binding the cells together and strengthening the skin's function as a barrier. The marine collagen smoothes over the wrinkles and tightens the skin for an immediate anti-tiredness effect. The essential oil of rose has regenerating and stimulating properties.

## A brightening complexion

The Thai people use the rice for its softness and its soothing effect on the skin. This cosmetic activity associated with the symbol of life and abundance it conveys make the rice the ideal ingredient for delicate treatments adapted to the more sensitive zones.

## Anti-tiredness activity

The marine collagen is essentially made of amino acids which essentially include the prolin, the hydroxyprolin and the glycin: this richness gives the mask its regenerating power which regulates the skin elasticity. Rich in marine collagen, this mask smoothes the wrinkles for an instant anti-tiredness effect. The essential oil of rose tonifies the epidermis.

Alginate, rice starch, marine collagen, essential oil of rose

Dose : 10g of powder and 30mL of water.

Pour all water at once on the powder, stir quickly and vigorously during one minute to get a homogeneous paste.

Important : use water at 20°C.

The customer must close the eyes. Protect the eyelashes with a small piece of gauze. Apply the mask to the eyelids and the eye contour. The mask sets within 5-6min. Leave the mask to perform its function at least 15 minutes. Remove it by peeling off in one whole piece.
